R topics documented:

`airline_safety` *Should Travelers Avoid Flying Airlines That Have Had Crashes in the Past?*

Description

The raw data behind the story "Should Travelers Avoid Flying Airlines That Have Had Crashes in the Past?" http://fivethirtyeight.com/features/should-travelers-avoid-flying-airlines-that-have-had-c

Usage

```
airline_safety
```

Format

A data frame with 56 rows representing airlines and 9 variables:

airline airline

incl_reg_subsidiaries indicates that regional subsidiaries are included

avail_seat_km_per_week available seat kilometers flown every week

incidents_85_99 Total number of incidents, 1985–1999

fatal_accidents_85_99 Total number of fatal accidents, 1985–1999

fatalities_85_99 Total number of fatalities, 1985–1999

incidents_00_14 Total number of incidents, 2000–2014

fatal_accidents_00_14 Total number of fatal accidents, 2000–2014

fatalities_00_14 Total number of fatalities, 2000–2014

`avengers` *Joining The Avengers Is As Deadly As Jumping Off A Four-Story Building*

Description

The raw data behind the story "Joining The Avengers Is As Deadly As Jumping Off A Four-Story Building" http://fivethirtyeight.com/features/avengers-death-comics-age-of-ultron/.

Usage

```
avengers
```

Format

A data frame with 173 rows representing characters and 21 variables:

url The URL of the comic character on the Marvel Wikia

name_alias The full name or alias of the character

appearances The number of comic books that character appeared in as of April 30

current Is the member currently active on an avengers affiliated team?

gender The recorded gender of the character

probationary_intro Sometimes the character was given probationary status as an Avenger, this is the date that happened

full_reserve_avengers_intro The month and year the character was introduced as a full or reserve member of the Avnegers

year The year the character was introduced as a full or reserve member of the Avengers

years_since_joining 2015 minus the year

honorary The status of the avenger, if they were given "Honorary" Avenger status, if they are simply in the "Academy," or "Full" otherwise

death1 TRUE if the Avenger died, FALSE if not.

return1 TRUE if the Avenger returned from their first death, FALSE if they did not, blank if not applicable

death2 TRUE if the Avenger died a second time after their revival, FALSE if they did not, blank if not applicable

return2 TRUE if the Avenger returned from their second death, FALSE if they did not, blank if not applicable

death3 TRUE if the Avenger died a third time after their second revival, FALSE if they did not, blank if not applicable

return3 TRUE if the Avenger returned from their third death, FALSE if they did not, blank if not applicable

death4 TRUE if the Avenger died a fourth time after their third revival, FALSE if they did not, blank if not applicable

return4 TRUE if the Avenger returned from their fourth death, FALSE if they did not, blank if not applicable

death5 TRUE if the Avenger died a fifth time after their fourth revival, FALSE if they did not, blank if not applicable

return5 TRUE if the Avenger returned from their fifth death, FALSE if they did not, blank if not applicable

notes Descriptions of deaths and resurrections.

Source

Deaths of Marvel comic book characters between the time they joined the Avengers and April 30, 2015, the week before Secret Wars #1.

`bad_drivers` *Dear Mona, Which State Has The Worst Drivers?*

Description

The raw data behind the story "Dear Mona, Which State Has The Worst Drivers?" http://fivethirtyeight.com/datalab/which-state-has-the-worst-drivers/

Usage

```
bad_drivers
```

Format

A data frame with 51 rows representing the 50 states + D.C. and 8 variables:

state State

num_drivers Number of drivers involved in fatal collisions per billion miles

perc_speeding Percentage of drivers involved in fatal collisions who were speeding

perc_alcohol Percentage of drivers involved in fatal collisions who were alcohol-impaired

perc_not_distracted Percentage of drivers involved in fatal collisions who were not distracted

perc_no_previous Percentage of drivers involved in fatal collisions who had not been involved in any previous accidents

insurance_premiums Car insurance premiums ($)

losses Losses incurred by insurance companies for collisions per insured driver ($)

biopics *'Straight Outta Compton' Is The Rare Biopic Not About White Dudes*

Description

The raw data behind the story "'Straight Outta Compton' Is The Rare Biopic Not About White Dudes" http://fivethirtyeight.com/features/straight-outta-compton-is-the-rare-biopic-not-about-whit

Usage

```
biopics
```

Format

A data frame with 761 rows representing movies and 14 variables:

title Title of the film.

site Text to append http://www.imdb.com/title/ to for IMDB url. E.g. http://www.imdb.com/title/tt1711425

country Country of origin.

year_release Year of release.

box_office Gross earnings at U.S. box office.

director Director of film.

number_of_subjects The number of subjects featured in the film.

subject The actual name of the featured subject.

type_of_subject The occupation of subject or reason for recognition.

race_known Indicates whether the subject's race was discernible based on background of self, parent, or grandparent.

subject_race Race of the subject.

person_of_color Dummy variable that indicates person of color.

subject_sex Sex of subject.

lead_actor_actress The actor or actress who played the subject.

comic_characters *Comic Books Are Still Made By Men, For Men And About Men*

Description

The raw data behind the story "Comic Books Are Still Made By Men, For Men And About Men" http://fivethirtyeight.com/features/women-in-comic-books/.

Usage

```
comic_characters
```

Format

A data frame with 23272 rows representing characters and 16 variables:

publisher Comic publisher: DC Comics or Marvel

page_id The unique identifier for that characters page within the wikia

name The name of the character

urlslug The unique url within the wikia that takes you to the character

id The identity status of the character (Secret Identity, Public identity, [on marvel only: No Dual Identity])

align If the character is Good, Bad or Neutral

eye Eye color of the character

hair Hair color of the character

sex Sex of the character (e.g. Male, Female, etc.)

gsm If the character is a gender or sexual minority (e.g. Homosexual characters, bisexual characters)

alive If the character is alive or deceased

appearances The number of appareances of the character in comic books (as of Sep. 2, 2014. Number will become increasingly out of date as time goes on.)

first_appearance The month and year of the character's first appearance in a comic book, if available

month The month of the character's first appearance in a comic book, if available

year The year of the character's first appearance in a comic book, if available

date The date of the character's first appearance in a comic book, if available

Source

DC Wikia http://dc.wikia.com/wiki/Main_Page and Marvel Wikia http://marvel.wikia.com/Main_Page. Characters were scraped on August 24, 2014. Appearance counts were scraped on September 2, 2014. The month and year of the first issue each character appeared in was pulled on October 6, 2014.

`daily_show_guests` *Every Guest Jon Stewart Ever Had On 'The Daily Show'*

Description

The raw data behind the story "Every Guest Jon Stewart Ever Had On 'The Daily Show'" http://fivethirtyeight.com/datalab/every-guest-jon-stewart-ever-had-on-the-daily-show/.

Usage

```
daily_show_guests
```

Format

A data frame with 2693 rows representing guests and 5 variables:

year The year the episode aired

google_knowledge_occupation Their occupation or office, according to Google's Knowledge Graph or, if they're not in there, how Stewart introduced them on the program.

show Air date of episode. Not unique, as some shows had more than one guest

group A larger group designation for the occupation. For instance, us senators, us presidents, and former presidents are all under "politicians"

raw_guest_list The person or list of people who appeared on the show, according to Wikipedia. The GoogleKnowlege_Occupation only refers to one of them in a given row.

Source

Google Knowlege Graph, The Daily Show clip library, Wikipedia.

`democratic_bench` *Some Democrats Who Could Step Up If Hillary Isn't Ready For Hillary*

Description

The raw data behind the story "Some Democrats Who Could Step Up If Hillary Isn't Ready For Hillary" http://fivethirtyeight.com/datalab/some-democrats-who-could-step-up-if-hillary-isnt-ready-f

Usage

```
democratic_bench
```

Format

A data frame with 67 rows representing members of the Democratic Party and 3 variables:

candidate Candidate

raised_exp Amount the candidate was expected to raise

raised_act Amount the candidate actually raised

Source

See https://github.com/fivethirtyeight/data/tree/master/democratic-bench.

`endorsements` *Pols And Polls Say The Same Thing: Jeb Bush Is A Weak Front-Runner*

Description

The raw data behind the story "Pols And Polls Say The Same Thing: Jeb Bush Is A Weak Front-Runner" http://fivethirtyeight.com/features/pols-and-polls-say-the-same-thing-jeb-bush-is-a-weak-fr This data includes something we call "endorsement points," an attempt to quantify the importance of endorsements by weighting each one according to the position held by the endorser: 10 points for each governor, 5 points for each senator and 1 point for each representative

Usage

```
endorsements
```

Format

A data frame with 109 rows representing candidates and 9 variables:

year Election year

party Political party

candidate Candidate running in primary

endorsement_points Weighted endorsements through June 30th of the year before the primary

percentage_endorsement_points Percentage of total weighted endorsement points for the candidate's political party through June 30th of the year before the primary

money_raised Money raised through June 30th of the year before the primary

percentage_of_money Percentage of total money raised by the candidate's political party through June 30th of the year before the primary

primary_vote_percentage Percentage of votes won in the primary

won_primary Did the candidate win the primary?

Source

See https://github.com/fivethirtyeight/data/tree/master/endorsements-june-30

fandango *Be Suspicious Of Online Movie Ratings, Especially Fandango's*

Description

The raw data behind the story "Be Suspicious Of Online Movie Ratings, Especially Fandango's" http://fivethirtyeight.com/features/fandango-movies-ratings/. contains every film that has a Rotten Tomatoes rating, a RT User rating, a Metacritic score, a Metacritic User score, and IMDb score, and at least 30 fan reviews on Fandango.

Usage

```
fandango
```

Format

A data frame with 146 rows representing movies and 23 variables:

film The film in question

year Year of film

rottentomatoes The Rotten Tomatoes Tomatometer score for the film

rottentomatoes_user The Rotten Tomatoes user score for the film

metacritic The Metacritic critic score for the film

metacritic_user The Metacritic user score for the film

imdb The IMDb user score for the film

fandango_stars The number of stars the film had on its Fandango movie page

fandango_ratingvalue The Fandango ratingValue for the film, as pulled from the HTML of each page. This is the actual average score the movie obtained.

rt_norm The Rotten Tomatoes Tomatometer score for the film , normalized to a 0 to 5 point system

rt_user_norm The Rotten Tomatoes user score for the film , normalized to a 0 to 5 point system

metacritic_norm The Metacritic critic score for the film, normalized to a 0 to 5 point system

metacritic_user_nom The Metacritic user score for the film, normalized to a 0 to 5 point system

imdb_norm The IMDb user score for the film, normalized to a 0 to 5 point system

rt_norm_round The Rotten Tomatoes Tomatometer score for the film , normalized to a 0 to 5 point system and rounded to the nearest half-star

rt_user_norm_round The Rotten Tomatoes user score for the film , normalized to a 0 to 5 point system and rounded to the nearest half-star

metacritic_norm_round The Metacritic critic score for the film, normalized to a 0 to 5 point system and rounded to the nearest half-star

metacritic_user_norm_round The Metacritic user score for the film, normalized to a 0 to 5 point system and rounded to the nearest half-star

imdb_norm_round The IMDb user score for the film, normalized to a 0 to 5 point system and rounded to the nearest half-star

metacritic_user_vote_count The number of user votes the film had on Metacritic

imdb_user_vote_count The number of user votes the film had on IMDb

fandango_votes The number of user votes the film had on Fandango

fandango_difference The difference between the presented Fandango_Stars and the actual Fandango_Ratingvalue

`police_locals` *NA*

Description

The raw data behind the story "Most Police Don’t Live In The Cities They Serve" http://fivethirtyeight.com/datalab/most-police-dont-live-in-the-cities-they-serve/.

Usage

```
police_locals
```

Format

A data frame with 75 rows representing cities and 8 variables:

city U.S. city

force_size Number of police officers serving that city

all Percentage of the total police force that lives in the city

white Percentage of white (non-Hispanic) police officers who live in the city

non_white Percentage of non-white police officers who live in the city

black Percentage of black police officers who live in the city

hispanic Percentage of Hispanic police officers who live in the city

asian Percentage of Asian police officers who live in the city

Details

The dataset includes the cities with the 75 largest police forces, with the exception of Honolulu for which data is not available. All calculations are based on data from the U.S. Census.

The Census Bureau numbers are potentially going to differ from other counts for three reasons:

1. The census category for police officers also includes sheriffs, transit police and others who might not be under the same jurisdiction as a city's police department proper. The census category won't include private security officers.
2. The census data is estimated from 2006 to 2010; police forces may have changed in size since then.
3. There is always a margin of error in census numbers; they are estimates, not complete counts.

Note: Missing values means that there are fewer than 100 police officers of that race serving that city.
